Marshal Anzugila

Front-End Developer

PROFILE

I am a creative Front-End Developer with a passion for blending art and technology to deliver visually appealing web experiences. I channel my love for pencil art into designing clean and responsive interfaces that enhance functionality. I use HTML, CSS, JavaScript and React to make sure any mobile and browser compatibility is effective. Motivated by design excellence, I thrive on creating digital solutions that are as visually appealing as they are functional.

EMPLOYMENT HISTORY

AUG 2024 - PRESENT

Data Entry and Website Maintenance, Hearts of Care

- Enter, update and maintain accurate data in the company's spreadsheet.
- Verify data and correct errors to ensure accuracy of information.
- Manage large volumes of data with attention to detail.
- Update and publish content on company website.
- Monitors website performance and fix any bug to ensure smooth functionality.
- Ensure the website design and layout remain user-friendly.

JAN 2024 – MAR 2025

Website Development. Hearts of Care, Iccmkenya.org

- Designed, developed and maintained responsive website using HTML, CSS, JavaScript and React.
- Built and customized UX/UI themes and templates.
- Implemented front-end functionality for effective user experience.
- Developed and tested website features to ensure device compatibility.
- Collaborated with designers to deliver visually appealing and functional sites.
- Ensured smooth functionality of the website.

Key responsibilities: maintaining accurate and up-to-date data through careful entry and verification, updating and monitoring website content to ensure functionality and user-friendliness, and developing responsive web pages using HTML, CSS, JavaScript, and React. This included troubleshooting issues, implementing front-end features, and collaborating with designers to enhance user experience across all devices.
